Career Objective

An enthusiastic BCA student eager to secure an internship focusing on **Full-Stack or Front-End Web Development**. My objective is to immerse myself in a professional environment, mastering **Web Development**, collaborating on live projects, and rapidly expanding my skills from foundational coding to delivering production-ready, performant web applications.

Technical Skills

- **Front-End:** HTML – Structure of web pages, CSS – Styling and layout, JavaScript – Logic and interactivity, React.js – JavaScript library for building user interfaces, Tailwind CSS – Utility-first CSS framework for styling, Redux – State management library for React
- **Back-End (Basics):** Node.js – JavaScript runtime environment for building the server, Express.js – Web framework for Node.js to create APIs and handle routes, REST API – Architectural style for building APIs (communication between frontend & backend)
- **Database & ORM:** MongoDB, Mongoose – ODM (Object Data Modeling) library for MongoDB (used with Node.js)
- **Version Control & Collaboration:** GitHub – Platform for hosting and sharing code repositories, VS Code, Git
- **Other:** Responsive Web Design, API Integration
